

AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Claims 1-3. (Cancelled).

4. (Currently Amended) Audiovisual reproduction system, comprising ~~consisting of~~ a central unit controlling ~~a the display means~~, a touch screen, memory ~~means~~ and a telecommunications modem connected to a distribution network controlled by a host server through a multitask operating system comprising a library of tools and services, wherein the operating system of the reproduction system comprises:

- means for providing a list including information of downloadable audiovisual records that are not yet available on the audiovisual reproduction system;

- means for storing in the memory a file regrouping information of said list in a questionnaire; and

- a module including:

1) a procedure for reading in the memory of the file storing said questionnaire;

2) a procedure for enabling a plurality of data representative of audiovisual records automatically sends a request to the host server requesting that at least one selected song be downloaded, to be displayed by the display, said plurality of data being integrated in each song being determined as a function of the answers to a

said questionnaire ~~which is stored in a file in the memory to be displayed by the display means at the appropriate moment;~~

3) a procedure for interpreting answers to said questionnaire and selecting downloadable audiovisual records, said answers corresponding to user and to which users replay by actions on the touch screen; and

4) a procedure using selection of downloadable audiovisual records for automatically sending a request to the host server requesting that at least one selected audiovisual record be downloaded.

5. Audiovisual reproduction system according to claim 4, wherein an operator of the reproduction system ~~downloads~~ ~~download~~ a list of audiovisual records ~~songs~~ on the host server through the information distribution network, the host server then downloading the audiovisual records ~~songs~~ in the list prepared by the operator into the memory of a determined audiovisual reproduction system through the same distribution network.

6. Audiovisual reproduction system according to claim 4, wherein an order is sent to at least one determined reproduction system through a file downloaded on the reproduction system through the host server, this order being memorized by the reproduction system and used to play one or more particular audiovisual records ~~songs~~ at one or more particular moments.

Claims 7-18. (Cancelled).

19. (New) Audiovisual reproduction system according to claim 4, wherein said module of the operating system is adapted for updating a file storing user's answers memorized in the memory, said module updating a user's answers file whenever a user chooses through an action on the touch screen a new audiovisual record in said list.

20. (New) Audiovisual reproduction system according to claim 5, comprising a counter for counting the number of times that an audiovisual record is chosen in said list, said module comparing this number with a predetermined threshold so as to perform interpretation of user's answers and enable selection of downloadable audiovisual records.
